Dear Lidwien:

"For thousands of years the quality of the craftsmanship and the skill of the artisans of Yemen have produced remarkably beautiful and extremely important works. This valuable work is not easily accessible by many people.

As the worlds architects and designers artists and artisans descend on Venice they should not miss the modest, unassuming yet poetic demonstration of this art on display in the aptly named Asenale in Venice. it is heartening to see this important heritage work being acknowledged and proudly displayed at the Venice Architecture Biennale."
